EDUCATION

Belarusian State University
Radiophysics
2013-2017

SPOKEN LANGUAGES LEVELS

Russian: Native
English: B2

PROFILE

Versatile DevOps Engineer with 7+ years of experience spanning System Administration, Cloud Engineering, and Product DevOps. Proven track record in providing maintenance and support for high-availability environments, evolving from legacy Windows/Linux systems to modern multi-cluster Kubernetes architectures. Core expertise lies in architecture and infrastructure design, Kubernetes, AWS, and building resilient platforms. Expert in developing CI/CD according to GitOps concepts (ArgoCD), automating deployments to bare-metal, Kubernetes, and AWS, as well as administrative processes, and implementing proactive monitoring and observability. Experienced in designing Disaster Recovery strategies (AWS EKS) and troubleshooting environments down to the code level (Go, Python). Strong focus on ensuring system security, fixing security threats, and advising development teams on architectural solutions.

Product DevOps Engineer

- Migration of product architecture (Go stack) to Kubernetes
- Developing Helm charts and k8s-native Docker images
- Implementing GitOps concepts via ArgoCD
- Executing Disaster Recovery strategies using Argo Workflows and AWS EKS
- Modernizing and maintaining Jenkins and GitLab CI pipelines for hybrid deployment and automated testing
- Introducing pre-commit hooks and linters for code quality control
- Migrating and orchestrating Kafka in K8s via Strimzi Operator and maintaining streaming pipelines (Debezium, MirrorMaker)
- Optimizing deployments and reducing cluster resource consumption
- Troubleshooting production incidents at both infrastructure and code levels (including Go SIGSEGV fixes)
- Migrating monitoring from Zabbix to Prometheus with alert tuning
- Configuring log collection via Vector and testing networking solutions (MetalLB, Cilium)
- Consulting development teams on K8s migration and conducting architectural reviews

Kubernetes (on-prem / AWS EKS) / Helm / ArgoCD / Argo Workflows / Docker / Jenkins / GitLab CI / pre-commit / Kafka (Strimzi) / Debezium / MirrorMaker / PostgreSQL / ZooKeeper / etcd / Prometheus / Thanos / Alertmanager / Vector / Zabbix / Grafana / Puppet / Hiera / MetalLB / Cilium / AWS Route53 / Python / Bash / Go.

DevOps Engineer

- Migration to GCP
- Developing CI/CD pipelines according to GitOps concept
- Maintenance and troubleshooting of environments, Docker and pipelines
- Developing Python scripts for automation
- Consulting development teams on CI/CD implementation
- Developing and implementing Ansible playbooks
- Security consulting
- Creating and mentoring cloud technology training

AWS / GCP / Azure / Python / Docker / Docker-Compose / K8s / Ansible / Jenkins / Gitlab CI/CD / GitHub Actions

System Administrator

- Organization of backups: sites, IIS settings, various directories, configurations and virtual machine data
- Keeping systems and firmware up-to-date, ensuring high availability
- Monitoring and notifications for systems, equipment, availability and backup integrity
- System configuration, services and roles
- Prevention of critical events and troubleshooting
- Infrastructure planning and implementation
- Automation of administrative processes

Windows Server / MS SQL / AWS (EC2 / S3) / Dell PowerEdge/PowerVault / Synology NAS / Ipswitch WhatsUp Gold

System Administrator

Internship.
Windows Server / MS SQL / Synology NAS / Ipswitch WhatsUp Gold

PROJECTS

TradingView

Platform for traders and investors.
Responsibilities:
Support and development of company product services.

Security consult

Consulting security solutions.
Responsibilities:
Consulting and configuring security solutions.

Elinext Oct. 2023 - Jun. 2024	Elinext Cloud Training Internal cloud technology training Responsibilities: Creating and mentoring AWS cloud technology training.
Elinext Jun. 2023 - Oct. 2023	Sat.io Satellite managing project. Responsibilities: Implementing CI/CD pipelines, advising development teams on the implementation of CI/CD pipelines, resolving issues of containerization.
Elinext Mar. 2023 - Jun. 2023	Elinext Gateway Internal corporate network. Responsibilities: Developing and implementing Ansible playbooks for automated server configuration.
Elinext Sep. 2022 - Feb. 2023	Broadcom DX Monitoring and analysis application. Responsibilities: Migration to GCP, developing CI/CD, maintenance, developing python scripts for automation.
Forbase Oct. 2018 - Nov. 2021	Marketing G2 Marketing solution for social media
Forbase Nov. 2018 - Nov. 2021	Safetypay Solution for payment methods
Forbase Feb. 2017 - Nov. 2017	Marketing G2 Marketing solution for social media

SKILLS

AWS	EC2 / Route 53 / S3 / VPC / Beanstalk / ECS / ECR / EKS / RDS / DevTools / SNS / Lambda / CloudFormation / CloudWatch
GCP	Compute / GKE / Storage
CONTAINERIZATION & ORCHESTRATION	Kubernetes / Helm / Docker / Docker-Compose / Swarm / MetalLB / Cilium
DEVOPS & GITOPS TOOLS	GitLab CI/CD / GitHub Actions / Jenkins / ArgoCD / Argo Workflows / Ansible / Puppet / Hiera / Terraform / Git
DATA, BROKERS & STREAMING	Kafka (Strimzi) / Debezium / MirrorMaker / PostgreSQL / ZooKeeper / etcd
MONITORING, LOGGING & OBSERVABILITY	Prometheus / Thanos / Alertmanager / Vector / Grafana / Zabbix / Ipswich WhatsUp Gold
SCRIPTING & LANGUAGES	Python / Bash / Go / PowerShell
LINUX SERVER & NETWORKING	CentOS / RHEL / Fedora / Debian / Ubuntu / Networking (iptables, L2TP, WireGuard, etc.)
WINDOWS SERVER	AD DC / GPO / DNS / DHCP / IIS / Hyper-V / DFS / Failover cluster / WSUS
VIRTUALIZATION	Hyper-V / VMware (vSphere)
STORAGE & HARDWARE	Synology NAS / Dell PowerEdge / Dell PowerVault / DELL (OME, OMSA, iDRAC)
OTHER	Network Security

PERSONALITY

Experimenting with new technologies and frameworks, continuous learning, resolving the most difficult problems, choosing the most appropriate technologies, flexible and organized.

HOBBIES

Programming, radio electronics, CTF.
